LINK Scheme ATM Footprint Report

May 2019

Published on 10th July 2019

In LINK's Final Decision and Impact Assessment on the results of its Interchange Consultation, published on 31st January 2018 (<https://www.link.co.uk/about/news/link-moves-to-secure-future-of-free-atms/>), the Board of LINK set out its commitment to maintain free access to cash for many years to come through an extensive footprint of ATMs with the same coverage as now. The date of this commitment started from 1st February 2018.

This included a commitment to leave interchange unchanged for all existing free ATMs 1 kilometre or more away from another free ATM, to ensure that LINK's reduction in interchange would not give a reason for closure. These ATMs are known as Protected ATMs.

This also initially included a commitment to apply at LINK's discretion a premium of up to 30 pence to deal with specific problems with free coverage of ATMs caused by loss of a Protected ATM. On the 1st April 2019, LINK introduced additional premiums that can significantly increase payments to ATM operators by up to £2.75 per cash withdrawal. Premiums will be made available to all eligible Protected machines; these measures are aimed at safeguarding free-to-use ATMs in remote and rural areas.

Should these premiums not deal with the problem within 2 months, LINK has the ability to directly commission ATMs to provide free access in these areas.

The Board has decided to publish the total number of Protected ATMs and the number where free access has been removed through closure or by being turned into charging ATMs. Reports will be provided on a regular basis.

This report then sets out an analysis of the number of Protected ATMs no longer transacting and, after identifying where there is alternative access to cash provision (such as a Post Office counter providing free cash access), and where there is no public impact (for example, because the site was not accessible to the general public, e.g. it was within a closed company site), it shows the resultant number of sites that will be targeted for replacement with premiums. Note that where the loss is due to a security reason such as a raid, and there are no willing site owners, LINK will not plan a replacement until the security situation is judged safe again by local site retailers and ATM operators.

In addition to this, LINK also publishes on its website the number of free and charging ATMs by parliamentary constituency.

LINK Scheme ATM Footprint Report

May 2019

Published on 10th July 2019

	Current Position	Net Change Since Last Month	Explanation/Definition
Total Protected ATMs	2,660 (100%)	+81	Free-to-use ATMs that do not have another free-to-use ATM within 1 km. From October 2018, this figure is updated monthly and to include additional ATMs that now meet Protected status.
Live ATMs	2,449 (92%)	+38	A live ATM is one that is connected to the LINK network and being used.
ATMs No Longer Transacting	211 (8%)	+43	An ATM that is not active (reason will need investigating to confirm if permanently closed, or if the closure is temporary due to operational issues such as an upgrade or machine change). In May, 51 Protected ATMs were identified as no longer transacting or switched to pay-to-use. 8 Protected ATMs that were not transacting previously came back online, were replaced or removed from Protection making a net change of +43.

ATMs No longer Transacting	211 (8%)	+43	In May, 51 Protected ATMs were identified as no longer transacting or switched to pay-to-use. 8 Protected ATMs that were not transacting previously came back online, were replaced or removed from Protection making a net change of +43.
Temporarily Out of Action	8	+2	Temporary issue with site, plan in place to re-install.
Investigations with Operator Underway	25	+14	Under investigation.
ATMs Confirmed as Closed	178 (6.7%)	+27	Free-to-use ATM permanently closed or switched to pay-to-use.

ATMs Confirmed as Closed	178 (6.7%)	+27	As above.
ATMs Not Being Replaced	134	+19	Locations where consumer have free access to cash over the counter from the Post Office (82), or where the site was not accessible to the general public (34), e.g. inside a corporate building, or where there is a security issue (18).

Link Scheme Holdings Ltd

ATMs Targeted for Replacement	44 (1.6%)	+11	Further action taken by LINK to replace – see detail below.
--------------------------------------	------------------	------------	--

ATMs Offered Premiums for replacement	19	+5	Premiums are offered to LINK Members for a 2-month period.
ATMs Not Replaced after 2 months – Now within Direct Commissioning	25	+6	After 2 months of offering premiums, LINK will look to replace ATMs through directly commissioning a LINK Member to deploy and run a free ATM. These ATMs are currently within the Direct Commissioning Process and over time will either be resolved through a replacement ATM or it will be determined that a replacement is not currently possible and reported below.

ATM Targeted for Replacement Now Resolved	18	+3	Where a targeted for replacement site has now got free access to an ATM, whether through premiums, direct commissioning or through the free competitive market.
ATMs Targeted for Replacement - Resolution not Currently Possible.	6	+3	Where it is not currently possible to replace a closed Protected ATM for reasons such as no suitable premises within 1km, no willing site owners to host an ATM or no operator willing to deploy an ATM.

A list of the 178 locations where ATMs are “Confirmed as Closed” is included with this Report.

Where an ATM is “Confirmed as Closed”, LINK assesses whether there is a Post Office counter service nearby as an alternative method for consumers to access their cash. If there is not a Post Office and the previous ATM was publicly accessible, then the area will be designated as “ATM Targeted for Replacement”. LINK does not own or operate ATMs and the siting of ATMs is a competitive market for ATM operators who choose to deploy where it makes sense for them to do so commercially. LINK therefore offers premiums to operators to support the deployment of a free-to-use ATM in locations designated as “ATMs Targeted for Replacement”. Where an operator commits to an installation, it can take a number of months for the ATM to be replaced. This period can vary depending on a number of factors e.g. the time it may take to find a suitable and willing retailer, negotiating commercial contracts, buildings works or potentially planning consents.

Financial Inclusion Programme Update

See separate attachment.

Interchange Strategy Changes

On 16th July 2018, LINK announced changes to future interchange rates, canceling the third 5% cut due in 2020 and putting on hold the fourth due in 2021.

Link Scheme Holdings Ltd

On 20th September 2018, LINK announced increases to cash interchange rates effective from 1st October 2018 in response to changes in the Bank of England's base rate. This had the effect of increasing cash interchange rates by approximately 2%.

On 1st January 2019, LINK reduced interchange rates by 5% in line with its interchange announcement at the end of January 2018.

On the 1st April 2019, LINK introduced additional premiums that can significantly increase payments to ATM operators by up to £2.75 per cash withdrawal. Premiums are available to all eligible Protected machines and ATMs which resolve access in the most deprived areas under the Financial Inclusion Programme. These measures are aimed at safeguarding free-to-use ATMs in remote and deprived areas.
